

Non-Profit and Government Organizations

The following are examples of agencies that are non-profit or governmental where you can perform your community service. You are not limited to these agencies, as long as the agency you choose is non-profit. If the agency is not a non-profit, and you choose to perform your community service there, your hours will not count. Please be sure the agency is non-profit, all agencies can tell you if they are or not. If you are paid for your work, it is not community service.
